(54) Title: METHOD OF DETERMINING STATE VARIABLES AND CHANGES IN STATE VARIABLES

(57) Abstract: The present invention relates to a method of determining physical, chemical and/or biological state variables, particularly substance concentrations, temperature, pH and/or physical fields, and/or the change in these state variables in an examination area of an examination object by determining the change in the spatial distribution of magnetic particles in this examination area by means of the following steps: a) introducing magnetic particles into at least part of the examination area in a first state in which at least some of the magnetic particles are agglomerated and/or coupled to one another in pairs or more, or introducing magnetic particles in a second state in which the particles are deagglomerated and/or decoupled, b) generating a magnetic field with a first part-area having a low magnetic field strength and a second part-area having a higher magnetic field strength, c) changing the spatial position on the two part-areas in the examination area or changing the magnetic field strength in the first part-area, d) detecting signals that depend on the magnetization in the examination area that is influenced by this

change, and e) evaluating the signals so as to obtain information about the change in the spatial distribution of the magnetic particles and/or about physical, chemical and/or biological state variables or the change therein in the examination area. The invention further relates to magnetic particle compositions and their use in a method according to the invention. The invention further also relates to an apparatus for the measurement of state variables.

WO 2004/091397 A3

**Date of publication of the revised international search
report:** 24 March 2005

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

INTERNATIONAL SEARCH REPORT

International Application No
PCT/IB2004/050449

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 A61B5/06 A61K49/18

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 A61B A61K G01N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
EP0-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	EP 0 095 124 A (BRUKER MEDIZINTECH) 30 November 1983 (1983-11-30) cited in the application claims 1-3	40
A	US 4 136 683 A (GORDON ROBERT T) 30 January 1979 (1979-01-30) the whole document	40
A	US 6 082 366 A (ANDRAE WILFRIED ET AL) 4 July 2000 (2000-07-04) column 4, line 48 - column 5, line 55	40
P,A	EP 1 304 542 A (PHILIPS CORP INTELLECTUAL PTY ; KONINKL PHILIPS ELECTRONICS NV (NL)) 23 April 2003 (2003-04-23) paragraphs [0030] - [0040], [0050] - [0054]	40

☐ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

INTERNATIONAL SEARCH REPORT

International application No.
PCT/IB2004/050449

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 1-20, 31, 39
because they relate to subject matter not required to be searched by this Authority, namely:
Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-20, 40

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-20, 40

A method and an apparatus for determining physical, chemical and/or biological properties or state variables in an examination area by determining the spatial distribution of magnetic particles in this area and use of monodomain particles.

2. claims: 21-31

Magnetic gas bubble composition comprising gas bubbles, magnetic gas bubble precursor for its manufacture and use as an imaging agent, in particular with acoustic waves.

3. claims: 32-37

(Kit of) magnetic particle compositions wherein the magnetic particles are bound to functional binding units or are agglomerated/coupled together and have a particular average particle to particle distance.

4. claims: 38, 39

Magnetic particle composition having a particular magnetization curve and its use.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.1

Claims Nos.: 1-20, 31, 39

Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery
